**7. GUIDANCE NOTES (INFORMATIVE ONLY – NOT MANDATORY)**

- (1) This activity may be undertaken in conjunction with activity APP2, in which case gigajoules for both this activity APP1A and activity APP2 may be claimed. Note, this only applies in cases where activity APP2 relates to removal and disposal of a main (primary) appliance and not in relation to a “secondary” appliance as defined under activity APP2.
- (2) Information on registration data for current models can be obtained from:  
[http://reg.energyrating.gov.au/comparator/product\\_types/28/search/](http://reg.energyrating.gov.au/comparator/product_types/28/search/).

- (3) Cooled appliance has the meaning as in AS/NZS 4474, being an appliance which cannot be classified as a refrigerator, refrigerator/freezer or freezer.
- (4) Transition factors have been applied to certain REPS activities to provide a pathway to transition the REPS toward delivery of a preferred mix of activities over the first five-year stage. Application of these factors provides a phased trajectory for retailers that addresses both the challenge of managing the downgrading of deemed gigajoules for lighting activities due to reducing additionality, as well as the pivot toward business models to deliver deeper retrofit activities and demand response activities.
- (5) A reference to a standard, code or legislative instrument is a reference to the version of the standard, code or legislative instrument in force at the time the activity is undertaken, including as amended or replaced.
