

# List of long duration capacity providers

Pursuant to Regulation 4 of the *National Electricity (South Australia) (Firm Energy Reliability and Orderly Exit Management) Regulations 2025*

October 2025

## Overview

Pursuant to Regulation 4 of the *National Electricity (South Australia) (Firm Energy Reliability and Orderly Exit Management) Regulations 2025 (Regulations)*, this document outlines the long duration capacity providers (**LDCPs**) recognised by the Minister as being suitable to be a participant in the Firm Energy Reliability Mechanism (**FERM**) scheme, after taking into account any criteria specified in the Minister's guidelines.

LDCPs include existing designated electricity entities and new designated electricity entities (as defined in the Regulations) capable of providing long duration dispatchable electricity capacity. Long duration dispatchable electricity capacity means dispatchable electricity capacity with a minimum of 8 hours continuous rated output.

## Existing designated electricity entities

## New designated electricity entities

The Minister recognises a person—

(a) who is required or intends to be registered by AEMO as a Generator or Integrated Resource Provider (other than, for the purposes of this paragraph, an existing designated electricity entity); or

(b) who is recognised by the Minister as being equivalent to a new designated electricity entity on account of the substantial replacement of existing assets; and

(c) who meets the eligibility criteria outlined in the Minister's Guidelines,  
as a long duration capacity provider.
