Technical Standard for Installation of Electric Vehicle Supply Equipment (EVSE or EVSDE) – Registered Equipment Compliance List

The registered equipment compliance list is a list of all electric vehicle supply equipment (EVSE) and electric vehicle supply and discharge equipment (EVSDE) which the Technical Regulator has approved for registration as compliant to requirements as detailed is the *Technical Regulator Guideline - Technical Standard for Installation of Electric Vehicle Supply Equipment (EVSE or EVSDE).*

Compliance with these guidelines can be achieved through one or three pathways:

- Option 1 Technical Standard - OCPP 1.6 (V2) or higher – listed as 'OCPP 1.6 (V2)'
- Option 2 Technical Standard - ANSI/CTA 2045-B – listed as 'ANSI/CTA-2045-B'
- Option 3 - Meets "Deemed to Comply" – listed as 'DTC'

This list is separated into two categories:

Table 1 – Lists registered products compliant with EVSE requirements.

Table 2 – Lists registered products compliant with EVSDE requirements.

These lists will be regularly updated as further applications for registration are received and processed.

A supplier of EVSE wishing to register a product with the Technical Regulator should complete Form A: Declaration of compliance, found on the Department for Energy and Mining's website and email the completed form to dem.smartappliances@sa.gov.au
